DEMO LAB

SCOPE

PETRIFIED FOREST NATIONAL PARK – DEMO LAB AUDIO SYSTEM (AUDIO VISUAL SCOPE OF WORK)

CCS PROJECTS NUMBER PR#07629

The following “Scope of Work” is prepared for Petrified Forest National Park:

CCS will integrate a full-duplex audio intercom system at the Petrified Forest National Park fossil demonstration lab.

Outside of the demo lab, CCS will install two surface-mount speakers with a U-bracket to allow flexibility of mounting to either the wall or the overhang in front of the window area, depending on structural constraints. A surface-mount/boundary microphone will be placed above the window to allow the audience to participate in the live demonstrations/Q&A.

Inside of the lab, CCS will install another set of two surface-mount speakers, as well as a ceiling microphone to allow the instructor to speak to the outside audience.

All audio processing will be done via a mixer/amplifier mounted in a 4-unit shelf-mounted rack. Volume control for both the interior and exterior zones will be controlled by two wall-mounted rotary dials.

Requirements:

- (1) 120V 20A duplex at the shelf rack location

CLIENT RESPONSIBILITIES

- Provide all power and network infrastructure (included in the above "Requirements" for each room) to support newly installed A/V devices
- Provide all open pathways, conduit, cable trays for newly installed A/V structured cable
- Provide open access to the space for a contiguous workflow/window of installation throughout installation time-frame
